

## TECHNICAL FEATURES

DESCRIPTION	temperature	Feature	Machine
GAS BURNER FOR SMOKES DEPURATOR	operation up to 1250 degrees C	Smoke's contact time 0,7 sec. about	This unit has the task to rise the smoke's temperature up to 500 degrees C.about in order to destroy the suspended oils.
high resistance to the sudden changes of temperature	melting up to 1450 degrees C.	good resistance to residual combustion of gas (methane,propane and so on) or of gas oil	Made of stainless steel, the inside part is duly insulated with refractory material

HIGH THERMAL INSULATION TO MINIMIZE THE LOSS OF HEAT
