RAW COFFEE BAG HANDLING SYSTEM	green coffee	one trailer (at least)	DEVICE Able to pick up and move coffee
		After an entire trailer has been unloaded, the system shall print a receiving report with the weight of green and the number of bags removed from the truck. This report will be used to cross check with the receiving report.	The pallet conveyor should extend to the green coffee bag processing equipment to facilitate direct unloading from truck to silos, if required, without additional forklift truck handling.

BAG HANDLING SYSTEM
